Experience

Front-End Web Developer/Designer: *Gemaire Distributors* | gemaire.com

Start - End

1525 NW 3rd St Suite 21, Deerfield Beach, FL 33442

May 2021 - Current

Updating and migrating internal company website front-end from ASP.NET MVC4 Razor to React v18.0

- **Architecting** structure for integration of React components from external, customer facing website to internal company website

- Solid foundation to **promote maintainability, interoperability, and performance**
- **Creating reusable components** to transfer to e-commerce website, and headless salesforce containers
- Mixing server side ASP.NET routing and client side React Router v6 routing

- Incrementally switching **Server Side Rendered MVC4 pages to Client Side Rendered React pages**

- Coding brand new React components to replace the current Razor Front-End

- **Created and maintaining Webpack** for integration and injection of React into company's internal site

- Migrating CSS to SASS/SCSS and Styled Components
- Managing npm modules

Resolving tickets through Jira for e-commerce website, <https://www.gemaire.com>

- Migrating components from RequireJS to React v16.8 with Webpack

Featured Project

Your Anime – *Anime Website (In Progress)*

[Demo](#) | [GitHub](#)

Search anime, track progress, add to watchlist, comment, and more

Technologies Used: Nextjs, GraphQL, Apollo, Tailwind, Prisma, Framer Motion, TypeScript, Clerk (Auth)

Receiving education on technologies such as graphql, apollo, clerk, and prisma

- Created APIs to hit PostgreSQL backend with Prisma
 - Learned how to implement authentication to allow users to create a profile where they can keep track of anime
 - Received education and furthered my knowledge of Typescript with Nextjs and React
-

Education

University of Central Florida: *B.S. in Business Administration, Integrated Business*

Graduation

May 2020
